Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This Office Action is in response to the amendment filed 11/9/07. Currently, claims 1-8 are pending in this application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by (JP 11-104916).

Regarding claims 1 and 3, '916 teaches a chamfering tool having a cutting section having an outer surface which is formed by a curved surface, the outer surface having a first blade section (2a: see below) which is tilted (by an angle α) so that a chip is discharged to one side of the edge, and a second blade section (2b: separated by a gap) which is tilted (by an angle ' α ') so that the chip is discharged to the other side different from the former side in a sliding direction of the cutting section ('916, figures 1, 3, 9). Furthermore, '916 teaches the first angle faces in X direction while the second angle faces in Y direction which is different than the X direction (see figure below).

Furthermore, '916 teaches figures 3-6, said chamfering tool having a shank section that is attached to a rotational chuck on the opposite side of the cutting section. Regarding claims 5 and 7, '916 teaches the first blade section (2a) and the second blade section (2b) being formed alternately in the peripheral direction of the outer peripheral surface while being symmetrical with respect to a rotating center axis of the cutting section ('916, figure 9a).

Allowable Subject Matter

Claims 2, 4, 6 and 8 are allowed.

Response to Arguments

Applicant's arguments filed 11/9/07 have been fully considered but they are not persuasive.

In response to Applicants argument (page 9) that "...the first blade is not is not tilted at a first angle while the second blade is tilted at a second angle so as to face a different direction from the direction faced by the first blade", Examiner respectfully disagrees. Broadly reading the claim, '916 teaches the first blade section (2a: see below) which is tilted (by an angle α) and a second blade section (2b: separated by a gap) which is tilted (by an angle α) whereby the first angle faces in X direction while the second angle faces in Y direction which is different than the X direction (see figure above).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
